

**Welding blankets can be used as curtains or cover - depends on the customer requirements; and with or without metal accessories.**

- Approved according to the highest applicable standards
- Suitable for horizontal and vertical use
- Produced from high-quality materials
- Suitable for high to extremely high temperatures

Datasheets for all materials are available with information about composition, tests.etc  
**We offer:**

Very high temperature, made from silica fiber	Highly mechanical resistant	Suitable for flame protection	Protection against radiation heat
• High temperatures up to 1000°C	• Temperature resistance up to 750°C or 550°C	• Flame protection till approx. 700°C	• Temperature resistance up to 550°C
• Peak temperature approx. 1300°C	• Peak temperature approx.900°C	• Peak temperature approx. 1000°C	• Radiation temperature approx. 1000°C
• Silica fabric (filament)	• Fiberglass cloth (texturised)	• Fiberglass cloth (texturised)	• Fiberglass cloth (texturised)
• Extreme circumstances	• 2 or 1 sided PU-coating (upon request)	• 2-sided HT coating	• 1 side aluminium foil
• Suitable for horizontal use	• Suitable for horizontal use	• Suitable for horizontal use	• Protection against radiation heat
• Material weight till 1200 gr/m2	• Material weight till 1300 gr/m2	• Material weight till 1100 gr/m2	• Material weight till 1060 gr/m2
